FORMER WICKES FOREST INDUSTRIES SITE
GROUNDWATER REMEDIATION SYSTEM

On 4 June 2004, the Regional Water Quality Control Board, Central Valley Region (Central Valley Water Board) adopted Order No. R5-2004-0066 (NPDES No. CA0081531) prescribing waste discharge requirements for the Collins & Aikman Products Company, Inc. to discharge treated groundwater from the former Wickes Forest Industries Site Groundwater Remediation System (Facility) to a drainage canal that is tributary to Ulatis Creek, a water of the United States. The Facility ceased all discharges to surface water in July 2005 and the Collins & Aikman Products Company, Inc. has since filed for bankruptcy, abandoning the groundwater remediation system. The California Department of Toxic Substances Control (DTSC) has assumed responsibility of the site. After an evaluation of the Facility, DTSC has determined that the existing treatment system is not adequate and would need to be completely reconstructed in order to consistently meet the requirements of the NPDES permit. DTSC is investigating other discharge alternatives and does not intend to discharge to surface water in the foreseeable future. For this reason, DTSC has requested that the NPDES permit be rescinded. The Central Valley Water Board will consider rescinding the NPDES permit.

A public hearing concerning this matter will be held during the Central Valley Water Board meeting which is scheduled for:
